Capstone Integrated Project (MAN6310) requires each project group to propose a suitable Client and Project.

Below is a brief checklist on a suitable client and project for Capstone unit:

- ✓ Client must be external to ECU.
- ✓ Projects must be managed via a suitable and proven project framework throughout.
- ✓ Projects must exercise students' knowledge from previous MMIS units, and/or refer to knowledge and techniques covered within ECU MMIS course.
- ✓ Projects must be of suitable size to be initiated and completed within 9 weeks of project execution.
- ✓ Project must include a strong, technical requirement to an IS-related area.

*** Please refer to the Capstone Integration Project (MAN6310) Unit Plan ***

Client and Project Application

Student Project Group Details		
Group Name:	Group 14	
Group Members:	Full name	Student ID
	Asad Narejo	10599281
	Jia-Qi Wu	10643390
	Mohammed Abdul Azhar	10645927
	Sajid Hossain Khan	10624983
	Shabab Shahrier Khan	10620424
	Sumanth Singanaboina	10641399

*** If group has a leader/coordinator/main contact, please indicate this.

Continued overleaf.

About the client and project	
Client Name: (include the business name and full contact details.)	Twenty2 Collective Ph: 1300491022 Emai: info@twenty2collective.com
Brief description of client business industry:	Twenty2 Collective supports and empowers individuals, teams and organisations to embrace new ways of working and living by providing coaching, training, facilitation and consulting services.
Project description: (describe the project and how it satisfies Capstone unit requirements.)	Build a cloud-based database with AI-driven assessment to address the pain points of the current system, enhancing user experience and decision-making. The system should include a cloud-based database, AI-driven assessment, and a customized dashboard.

Email this completed form to your lecturer ASAP and monitor your emails for a response, where you may be asked to provide further details.
